

CS 450 L2 activity — Given Rule → Find a Rule

Name (optional): _____

Work individually or with one partner. Commit your answers before the class review.

FRONT — GIVEN RULE (4 MINUTES)

Maya closes a campus café at 8:00 p.m. Café management gave her this rule:

If a customer joins the line at or before 7:50, take the order. If the customer joins after 7:50, decline the order so the staff can close.

1. Apply the supplied rule

Customer joins the line	Maya's action	What condition controlled the action?
7:45 p.m.	_____	_____
7:55 p.m.	_____	_____

2. Name the origin

Who supplied the final procedure? _____

What could Maya inspect or revise directly? _____

BACK — FIND A RULE (11 MINUTES)

Mina wants to predict whether a restaurant booking request will be completed (the party is seated). These six past examples include the observed outcome.

Card	Requested ahead	Party size	Observed outcome
A	4 hours	2	completed
B	3 hours	4	completed
C	2 hours	3	completed
D	1 hour	5	not completed
E	30 minutes	6	not completed
F	1 hour	6	not completed

3. Find rules that fit A-F

Write one rule that predicts every observed outcome above:

Write a different rule that also predicts every observed outcome above:

4. Commit predictions before outcomes appear

Use these two candidate rules:

- **Lead-time rule:** predict completed when requested at least 2 hours ahead.
- **Party-size rule:** predict completed for parties of 4 or fewer.

Card	New booking	Lead-time prediction	Party-size prediction
G	4 hours ahead; party of 2	_____	_____
H	1 hour ahead; party of 6	_____	_____
I	30 minutes ahead; party of 5	_____	_____
J	3 hours ahead; party of 6	_____	_____

Circle the rule you expect to score better on G-J: **lead time** / **party size** / **tie**

Do not turn this sheet over again or change answers during the iClicker review.
